

Armstrong®
CEILING SOLUTIONS

Ceiling Solutions
that offer endless design and
performance possibilities

SoundScapes

Stimulating shapes that define spaces and provide acoustical absorption

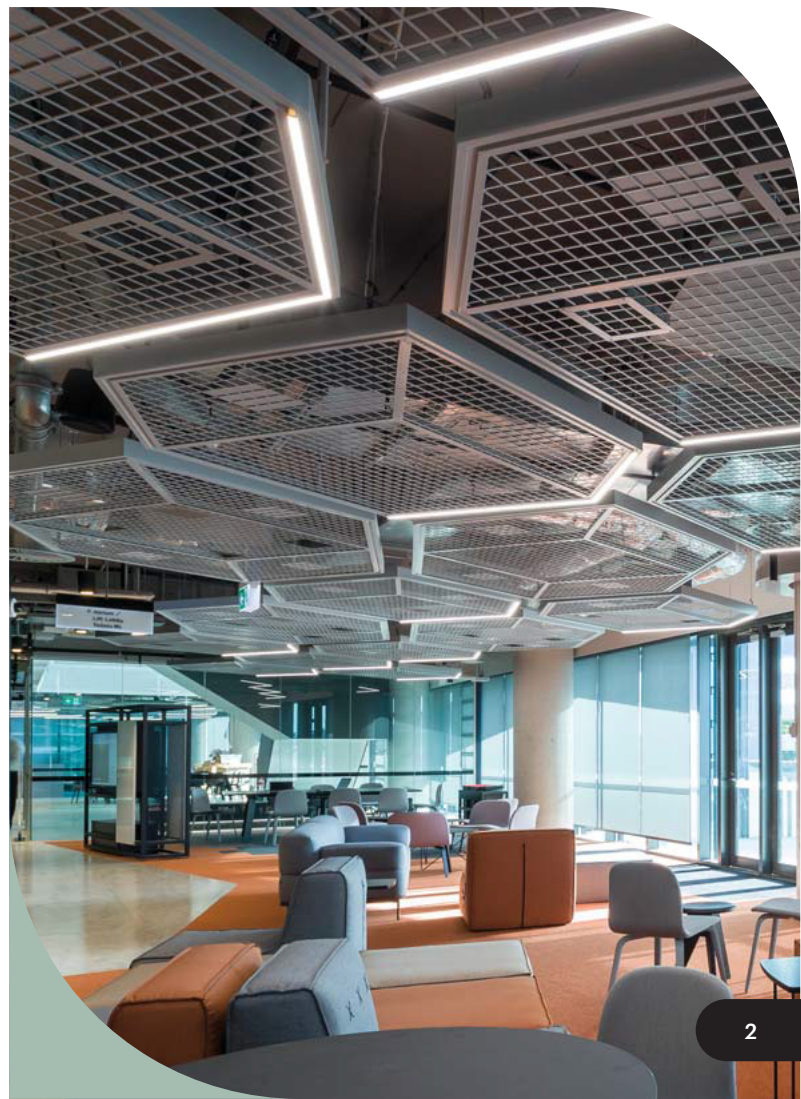

- An ideal acoustical solution for spaces that require an exposed aesthetic
- Effortlessly deliver acoustics via angles, layers, shapes, sizes and colours that delight both the eyes and ears of building occupants
- Adjustable to various heights and angles
- Can be installed individually or in group configurations
- Standard in white with custom colours available
- Flush-mounted suspension system for clean look
- Sound is absorbed from both sides of the panel
- Manufactured from 80% recycled content

MetalWorks

Metal ceilings designed to capture interest and imagination

- A metal ceilings range that incorporates systems designed for the budget conscious through to bespoke solutions
- Comprehensive range, from standard panels to concealed planks, mesh and floating ceiling solutions such as baffles and canopies
- Acoustical solutions to enhance sound absorption within a space or provide Total Acoustics (NRC + CAC)
- Colour options available
- Optional Trioguard™ dust repellent coating
- Enjoy on site support via dedicated Armstrong technical team
- Seamless integration of electrical and mechanical services

WoodWorks

Ceilings that allow you to bring a little nature inside

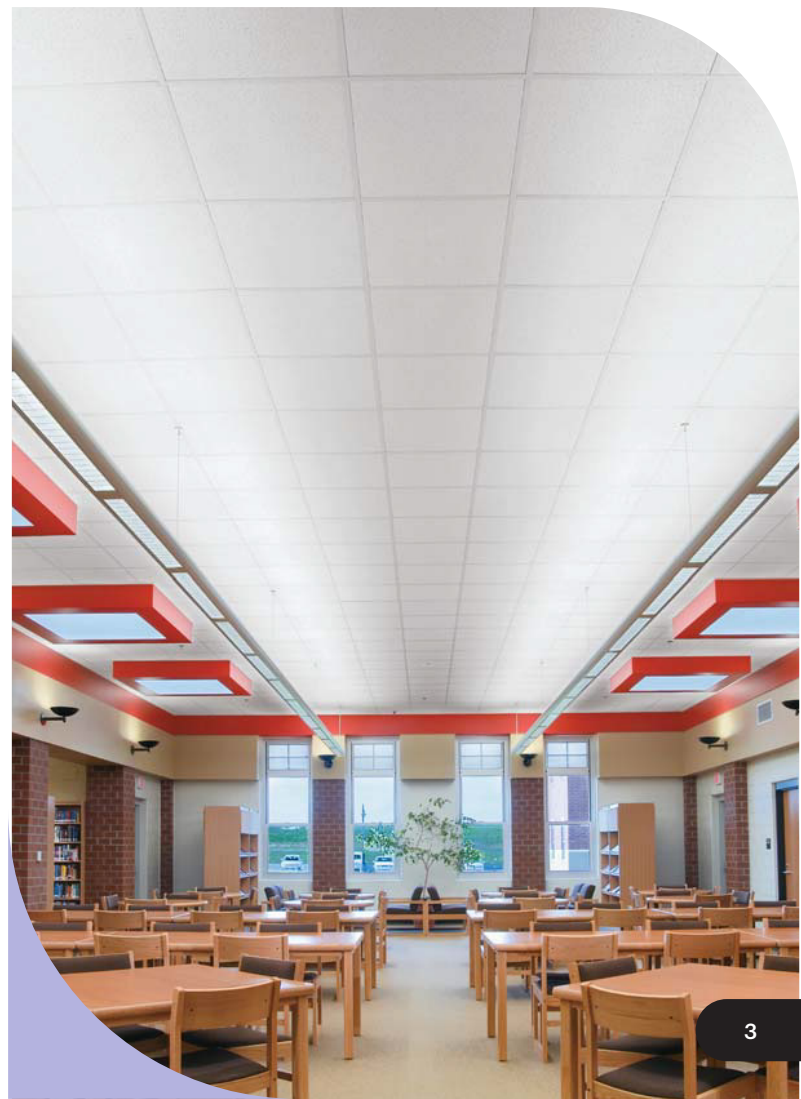

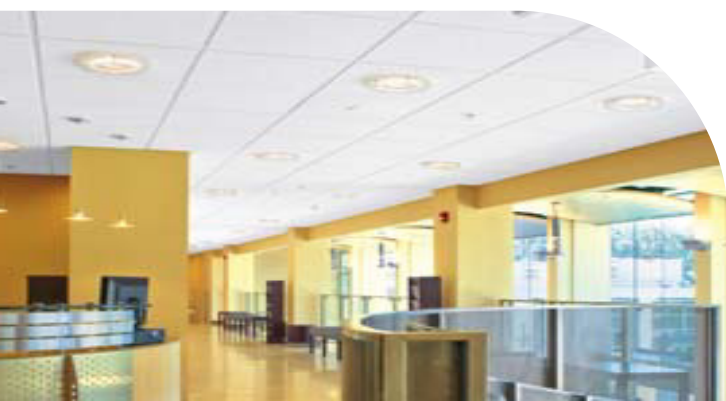

- A wood ceilings range that helps create biophilic spaces to enhance work, play, learning and healing environments
- Pre-engineered systems that are easy to handle and install
- Six veneer and three laminate finishes available
- A full variety of perforation options to enhance acoustical performance and design aesthetics
- Total Acoustic solutions available (NRC + CAC)
- Australian made
- FSC Certified

Mineral Fibre

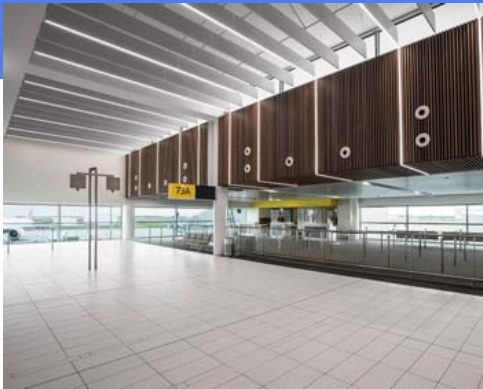

Where our journey began with acoustic ceiling solutions

- Easy to handle and install, our wide range of mineral fibre ceilings provide an acoustical solution for every space. From areas that require high sound absorption, to high sound attenuation or a balance of both resulting in Total Acoustics (NRC + CAC)
- Third party certified as "Eco and health preferable", being manufactured from only naturally occurring and recycled materials, free of chemicals of concern
- A variety of sizes, shapes and suspension systems available to enhance the look (as well as sound) of any space

Added Value: Our Why

To make a difference in the lives of people,
where they work, play, learn, heal and travel

Contact us and leverage our in house capabilities

For technical support

Our technical support team have both the product knowledge and technical ability to effectively respond to any query, regardless how complex.

For project management support

From the initial ceiling design vision through to project delivery, including on site installation advice and logistics support.

For prototypes, samples, guide specifications and literature

To access our in house design service

- CAD design
- Electrical and mechanical service integration
- Seismic solutions
- Sustainable solutions for Green Star and Well Building compliance
- Acoustical solutions
- BCA and Australian Standards compliance

Visit our website or contact us and discover how we can support you in your current project.
